LinkedIn-ID : <https://www.linkedin.com/in/vinisha-rathod>

### CAREER OBJECTIVE

Looking for a challenging role in a reputable organization to utilize my technical, database and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

### ACADEMIC BACKGROUND

Course	Year of Passing	University/Board	Institution	Grades
B.Tech	2023	Rajiv Gandhi Proudयोगiki Vishwavidyalaya, Bhopal	Sushila Devi Bansal College of Technology, Indore	8.60 CGPA
XII	2019	M.P Board, Bhopal	Unique Academy, Kukshi	8.84 CGPA
X	2017	M.P Board, Bhopal	Shri Guru Kripa Convent High School, Susari	8.63 CGPA

### PROJECTS

<b>Project Title</b>	<b>: Pilgrimage and Spiritual tourism website</b>
Technology Used	: HTML, CSS, Javascript, JAVA, MYSQL
Contribution	: Design and Development Support
Final Outcome	: This user-friendly pilgrimage website simplifies the exploration of Chardham and Saptपुरi destinations, providing overviews, convenient timetables, and packages. Travelers can effortlessly plan their spiritual adventures, discovering nearby attractions for a holistic experience. The platform's easy online booking system ensures a seamless journey, saving time and energy. "Pilgrimage website" is not just a website; it's a modern gateway to timeless traditions, offering a simple, secure, and impressive pilgrimage experience for all seekers in spiritual world with ease.
<b>Project Title</b>	<b>: Accounts Profile</b>
Technology Used	: PowerApps, MS-Excel, Dataverse and Power Automate
Contribution	: Planning, Development, Deployment and Bug Fixing
Final Outcome	: An application for maintaining contacts and accounts of client. Purpose of this application is to standardize client's accounts which were difficult to maintain in excel because of increasing data. It will also help on having centralized control throughout the organization as it is having multiple location from where this data flows in application. There are total 5 business unit where this data flows in the application
<b>Project Title</b>	<b>: Regulatory Service Tracker and Admin App</b>

Technology Used : PowerApps, Dataverse and Power Automate  
Contribution : Development Support and Bug Fixing  
Final Outcome : Regulatory Service Tracker is to combine different SKU emails into one place. Manager can assign tasks (email) to the specific user to work upon and they can reply from the application itself. This will facilitate the company to control all the SKUs from one place. It reduces a lot of manual effort.
